INVESTMENT OBJECTIVE AND STRATEGY

Investment Objective: The Advantus Strategic Dividend Income Fund seeks above-average income and long-term growth of capital, with a secondary objective of reduced volatility compared to broader equity markets.

Investment Strategy: Under normal conditions, the Fund intends to primarily invest in dividend-paying equity securities, including common and preferred stocks of utilities, infrastructure-related, real estate-related and other companies. Typically, 50 percent or more of the Fund's total assets will be allocated to real estate securities. The Fund also may invest up to 25 percent of its total assets in the securities of master limited partnerships (MLPs). In addition, the Fund may invest in exchange-traded funds (ETFs), exchange-traded notes (ETNs), Treasury inflation-protected securities (TIPS) and futures, and may write covered calls as it seeks to accomplish one or more of the following: manage inflation or volatility, increase income, or gain market exposure.

POTENTIAL KEY BENEFITS

- Dividend paying stocks may provide downside protection because the anticipated revenue stream of the dividend acts as a buffer against market volatility, while the real estate and commodity holdings can act as an inflation hedge.
- The Fund's goal is to produce higher income than investment-grade fixed income products, while managing volatility and inflation risk in a broadly diversified portfolio.
- Many dividend strategies overlook the real estate investment trust (REIT) sector, knowing the
 special expertise it takes to be successful there. The Firm has the experience to capitalize on
 this historically higher dividend-paying sector and the traditional sectors of utilities, oil and
 gas, and others.

30-Day SEC Yield ^{††}	4.08%
30-Day SEC Yield Unsubsidized ^{††}	3.77%

[†]Distribution Rate: Most recent distribution paid out during the quarter divided by the month end NAV and multiplied by 365/90 and does not include borrowings or a return of capital.

^{††}30-Day SEC Yield: Yield is based on the most recent 30 day period. The yield figure reflects the dividends and interest earned during the period, after the deduction of the fund's expenses. The SEC Yield formula is designed to determine an approximate amount of current income generated by the securities in the fund, and assuming that all dividends are reinvested, net of all expenses and expressed as a rate of return on the current maximum offering price.

Companies cannot guarantee that they will always be able to pay or increase their dividend payments.

Mutual fund investing involves risk. Principal loss is possible. Investors should be aware of the risks involved with investing in a fund concentrating in a specific industry such as REITs or real estate securities. These include risks such as declines in the value of real estate and increased susceptibility to adverse economic or regulatory developments. Investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations and illiquidity. The Fund may invest in smaller or medium-sized companies, which involve additional risks such as limited liquidity and greater volatility than large companies. The Fund may invest in foreign securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. The Fund may invest in ETFs and ETNs, which are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of the shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. MLPs are subject to certain risks inherent in the structure of MLPs, including complex tax structure risks, the limited ability for election or removal of management, limited voting rights, potential dependence on parent companies or sponsors for revenues to satisfy obligations, and potential conflicts of interest between partners, members and affiliates. The fund may also use options and future contracts, which have the risks of unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. Covered calls may limit the upside potential of the underlying security. Interest payments on TIPS are unpredictable

Diversification does not assure a profit or protect against loss in a declining market.
